directions:

Helium inflate the 42" Barbie balloon with the foil tip on your regulator. Tie with an uninflated 260Q balloon. Tie the other end of the 260Q directly to the pink heart-shaped heavy weight.

Air-fill 2–11" Pearl White balloons and size to 10 inches. Then tie together to form a duplet. Air-fill another identical duplet and twist the 2 sets together to form a 4-balloon cluster. Repeat the steps above using the Pearl Magenta 5" balloons. Size the balloons to 4½ inches. Make another cluster of Pearl Magenta balloons sized down to 3 inches. Set aside for later. Lay the Pearl White cluster flat and wrap the 260Q balloon attached to the heavy weight around the center of the cluster to secure your column. Lay the 4½" cluster on top of the white and wrap securely. Attach 2 tabs to the top of the Barbie balloon.

Helium inflate 2–18" foil balloons. Attach the ribbon to the bottom of the stem. This will keep helium from escaping from the balloon. Tie the balloons to the tabs on the Barbie. Use the 3" Magenta cluster and wrap around the tie point to cover the adhesive tabs. Project completed!
