 Latex Regulator

directions:

Helium inflate the 36" Grill balloon with the foil tip on your regulator. Tie with an uninflated 260Q balloon. Tie the other end of the 260Q directly to the star-shaped heavy weight.

Air-fill 2-12" Black LINK-O-LOON[®] latex and tie together to form a duplet. Air-fill another identical duplet and twist the 2 sets together to form a 4-balloon cluster. Repeat the steps above using the Yellow 5" balloons. Lay the Black cluster flat and wrap the 260Q balloon attached to the heavy weight around the center of the cluster to secure your cluster. Lay the Yellow cluster on top of the Black and wrap securely. Underinflate 4-5" Yellow balloons with air. Force the air with your hand into the tip end of the balloon. Tie each of these on the stinger of the Black LINK-O-LOON[®]. Snip off the excess balloon. Attach 2 tabs to the top of the Grill balloon.

Helium inflate 2-18" foil balloons. Attach Daffodil ribbon. Tie the balloons to the tabs on the Grill balloon. Project completed!
