

Instructions for Qualatex® Tower of Birthday Fun

To keep assembly time to a minimum, gather the materials and read through the instructions before beginning.

Tower of Birthday Fun

Labor: About 10 Minutes

Helium: As needed for number of balloons.

Materials:

24" (61cm) "Birthday Twinkling Stars" Double Bubble Balloons 002626

5" (13 cm) Citrine Yellow Latex Balloons Q0554

5" Mandarin Orange Latex Balloons Q0503

5" Sapphire Blue Latex Balloons Q0551

5" Quartz Purple Latex Balloons Q0544

Qualatex BalloonRibbon™

Qualatex Hand Air Inflator HI721

Clear Packaging Tape

Sand Weight

Instructions:

1. Helium inflate a Double Bubble, following the special inflation instructions on the back of the package, and tie a sand weight to its neck using BalloonRibbon.
2. Helium inflate another Double Bubble, and tape its tail to the top of the first Bubble using clear packaging tape, making sure to leave enough room in between for a balloon collar. Tape both the front and back for maximum hold.
3. Repeat to add as many Bubbles as you want.
4. To make a balloon collar, use a Qualatex Hand Air Inflator to inflate two 5" balloons to 4" (10 cm), and tie the necks together to make a pair. Repeat to make another pair, then twist the two pairs together. Before you twist on each collar, squeeze the packaging tape a little to make it more pliable. Twist each collar onto the tape between the Bubbles.
5. To complete the design, wrap another collar onto the neck of the Bubble directly on top of the sand weight.

TIPS

- Make the tower even more exciting when you create the balloon collars out of 260Qs.
- Fill the Bubbles with air and hang them from the ceiling for a long-lasting display that appears to float.
- Alternate the Double Bubbles with "Gumball" Deco Bubbles filled with coordinating latex to add interest to the tower. Instructions for making Gumball balloons out of Deco Bubbles can be found on the Deco Bubble package or at qualatex.com/qualatexbubbles.
