 6-*ea* 18"
 Foil Balloon

15001
 Monofilament

equipment:

831
 Mini Cool Aire®
 Dual Pro™ Inflator

BR74HG
 Dual Foil +
 Latex Regulator

directions:

Helium inflate fourteen black MagicArch™ balloons with the proper helium regulator (we recommend #BR74HG). Thread the balloons onto monofilament by running it through the center hole in each MagicArch™. Cut the monofilament line to desired length and secure to the anchor of your choice to form an arch shape.

Helium inflate the 36" foil vampire balloon and tie with monofilament. Then tie the 36" foil vampire balloon to the center of the MagicArch™ chain. Helium inflate six 18" coordinating balloons and tie with monofilament. Attach each directly onto the main line of monofilament equal distance apart.

Air-fill two black 5" Qualatex® balloons. Tie the necks together to form a duplet. Air-fill another identical duplet and twist the two together to form a four balloon cluster. Inflate three clusters.

To maintain the arch shape, wrap a four balloon cluster to the bottom end of each side of the arch. Wrap the remaining cluster around the neck of the 36" foil vampire balloon.
