Playful Santa

directions:

Air-fill the red Cubez™ balloon on the low-pressure setting with the Mini Cool Aire® Dual Pro™ inflator. Tape the balloon stem back onto itself. Wrap a 1 yard piece of #9 chevron ribbon around the balloon and tie in a tight knot at the top. Make a full 3 yd bow with the #9 chevron ribbon and tie with curling ribbon. Tie the bow onto the package. Tape 3 Heavy Weights™ balloon weights to the bottom of the package to add balance.

Helium inflate the 18" foil balloon and tie with curling ribbon. Set aside. Helium inflate the 37" Santa foil. Attach two Klik-Klik™ adhesive strips to Santa's foot. Secure into the bow on the package with a small piece of curling ribbon. Make a small bow with the #9 chevron ribbon. Cut a small piece of the chevron ribbon and secure both to Santa's package with OASIS® UGlu™ adhesive dashes. Tape the helium-filled 18" balloon to the Santa balloon. Attach two-14" air-filled foil Santa balloons to the package with dashes.
