Balloon Holder

BR74HG
Dual Foil + Latex
Inflator

directions:

Helium inflate 3-18" foil balloons with the proper tip on the helium regulator. Tie to the balloons with red curling ribbon. Insert the ribbon into the balloon holder to secure the balloons safely.

Insert a stick into the cup of each pre-inflated balloon. Arrange the balloon sticks in your hand so one balloon is higher than the other two. Use three pieces of Balloon Stick-Ems™ to secure the balloon sticks. Secure the balloon sticks at the bottom of the cluster of balloons in the middle of the sticks and at the bottom. Wrap the scarlet ribbon around the adhesive at the top of the wand and wrap tightly until you reach the bottom of the wand. The strong adhesive on the Balloon Stick-Ems™ will secure the ribbon safely. Make a simple bow using the scarlet sheer ribbon. Tie the bow with the curling ribbon and attach to the wand. Tie another bow with the curling ribbon and secure to the center of the scarlet ribbon. Place the wand into the bear's heart. Secure the wand to the heart with curling ribbon.

Slip the helium inflated balloons out of the balloon holder. Make a cluster of balloons by arranging the balloons with one balloon on top of the others. Tie directly to the bear's paw.
