

I am just taking a break from making toys
for all the good little girls and boys!

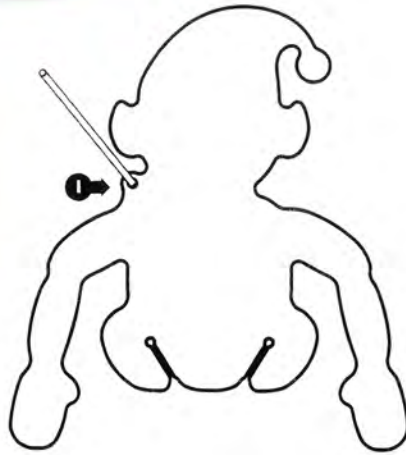

The ever-watchful "Santa's helper" makes a great balloon weight, centerpiece, or stand-alone gift!

Extra cute + easily assembled, this end-user inflated balloon has two points of inflation and is mouth-blown with the enclosed straw.

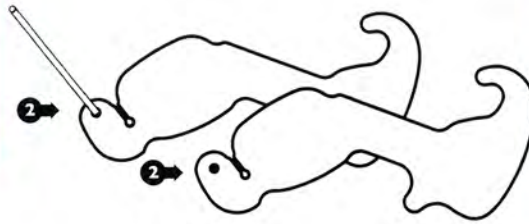

Step 1

Insert straw into inflation valve on body and blow into straw to inflate

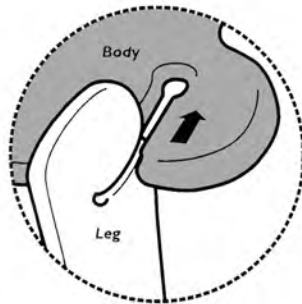

Step 2

Insert straw into inflation valve on leg and blow into straw to inflate, repeat for other leg

Step 3

Interlock leg and body by sliding leg channel into body channel
