 Latex Regulator

**829**  
 Twist-N-Flate™  
 Inflator

**01569**  
 OASIS®  
 Glue Pan

**01560**  
 OASIS®  
 Glue Pillows

## 3D Christmas Tree

### directions:

To make the Christmas Tree:

Air-fill two 5" red Qualatex® balloons to 4" and tie together to form a duplet. Using the Zoom! dual air inflator, you can fill two balloons at once. Air inflate another identical duplet and twist the two sets together to form a four-balloon cluster. Repeat these steps for a total of three red four-balloon clusters. Tie an uninflated 260 balloon to a Heavy Weights™ balloon weight. Lay one red four-balloon cluster flat and wrap the 260 balloon around the center of the cluster. Stack the remaining clusters on top and wrap the 260 balloon around several times to lock in place. Helium inflate the 39" foil balloon. Tie the stem with an uninflated 260 balloon. Tie the tree to the red base with the uninflated 260 balloon.

Add #40 ribbon to the foil tree as shown using cool glue. Hold in place for a few seconds to let the glue bond to the foil. Glue on the ornaments using the same method. Air inflate a few 5" red and blue Qualatex® balloons to desired size. Snip off any excess latex and glue the balloons directly to the foil christmas tree.

To make the present:

Make two four-balloon clusters using eight green 5" Qualatex® balloons. Stack the balloons directly on top of each other. Air-fill two yellow 160 balloons and tie together. Wrap the green package with the yellow 160 balloons. Twist them together at the top of the package to secure. Use the last bit of the balloons to make loops for a bow. Air-fill two more yellow 260 balloons, forming tight curls. Add these to the top of the green package. Glue a small blue balloon to the center of the bow.
