

Baby Elephant with Rattle

ingredients needed:

Q160-24
1-ea 160Q Latex
Balloons

9711212
Plush
Small Elephant

D31641
Holographic
Curling Ribbon

equipment:

829
Twist-N-Flate™
Inflator

01569
Glue Pan

01560
Glue Pillows

directions:

Air inflate a 160Q balloon about 2-inches and tie. Make an "apple twist": with a finger on your right hand, press the knot of the balloon thru the balloon and grab it with your left hand. To secure the knot, turn the balloon several times until it locks in place.

Create the handle of the rattle by dipping a small amount of glue on the un-inflated portion of the balloon and secure it into the end of the apple twist.

Make a small bow using the holographic ribbon and glue it to the rattle.

Note: to make the balloon rattle, put small dried peas into the balloon before inflating.
