Bubbles™ Balloon Arch

directions:

Step 1: Helium inflate Bubbles™ Balloon with the latex tip until full. Tie an uninflated 260 balloon to the stem.

Step 2: Helium inflate 9 more Bubbles™ Balloons. Attach to balloon holder

Step 3: Air-fill 5" balloons to be used as clusters.

Step 4: To make a balloon cluster, air-fill two 5" balloons to approximately 4.5". Tie the 2 necks together to make a duplet. Air-fill another duplet.

Step 5: Twist the 2 duplets together to form a cluster.

Step 6: Make 10 balloon clusters. Set aside.

Bubble Balloon® Arch

directions:

Step 7: Stretch monofilament line tightly between two points. Clip the pre-attached balloon ribbon off of the Bubbles™ Balloon. Tie the Bubbles™ Balloon to the monofilament line with the uninflated 260 balloon. Repeat, spreading balloons approximately 18" apart. *Tip: Attach each balloon with a single knot first, to allow the balloon to be spaced correctly before tying a secure knot.*

Step 8: Slip the balloon cluster onto the balloon stem between the knot of the uninflated 260 and the "bulb" of the Bubbles™ Balloon.

Step 9: To secure the cluster, twist the balloons around the stem of the Bubbles™ Balloon. When you have spaced the balloons properly along the length of the monofilament, secure the Bubbles™ Balloon in place by tying the uninflated 260 balloon in a knot under the cluster. Clip off the excess 260 balloon.

MERCHANDISING TIPS

Bubbles™ Balloon arches can be inflated up to 4 weeks prior to a holiday. For merchandising displays, make several balloon arches throughout the store. Decorate the registers, floral department, bakery, and center/main aisle. To turn your decorations into sales, clip the monofilament line on both sides of the bubble, DO NOT cut the stem of the Bubbles™ Balloon. Attach a ribbon and a weight and sell the balloon!
