 Wired Sheer
 Glitter Fabric

D31613
 Red Holographic
 Curling Ribbon

equipment:

01569
 Glue Pan

01560
 Glue Pillows

BR74HG
 Dual Foil + Latex
 Inflator

directions:

Step 1: Peel off paper backing from the candy box tape adhesive.

Step 2: Adhere candy box tape to the candy connector and press firmly onto the top of the chocolate candy.

Step 3: Remove the stick from the pre-inflated balloon and place the balloon cup onto the candy connector.

Step 4: Peel the paper backing off of two Stick-Ems™.

Step 5: Apply the Stick-Ems™ to each side of the candy connector.

Step 7: Make two-3 loop bows and tie with holographic ribbon. Secure the bows by pressing onto the Stick-Ems™.

Step 8: To enhance the balloon arrangement, cut cello paper into squares. Dip each square into a low temperature glue pan. Be sure to use the yellow glue pillows (item#01560), as this glue is resistant to temperature fluctuations.

Step 9: Continue gluing cello squares around the candy heart to enhance the bow.

Step 10: Make a small bow using the holographic curling ribbon. Dip the bow into the cool temperature glue pan and insert into the candy arrangement.

NOTE: For further instructions on making cello squares, please refer to the videos found in the Creative Solutions section of our website at www.burtonandburton.com
