directions:

Using the foil tip on BR74HG, helium inflate the 26" foil balloon at both filling points. Tie the stem of the balloon with an un-inflated Q260 balloon directly to a Heavy Weights™.

Air-fill two 11" heart shaped balloons until properly inflated. Tie the necks together to form a duplet. Air-fill another identical duplet and twist the sets together to form a four balloon cluster.

Air-fill four 6" red latex heart balloons until full. Make a four balloon cluster.

Flatten the large heart shaped cluster. Place a flattened 6" heart cluster on top. Secure the balloon clusters together with the un-inflated Q260 attached to the balloon weight.
