**directions:**

Helium fill the Easter Basket foil balloon with the foil tip on your regulator. Tie a Q260 balloon around the neck of the foil balloon. Tie the other end of the Q260 directly to the Heavy Weights™. Air-fill two-11" Chicks + Eggs latex balloons to 10" and tie the necks together to form a duplet. Air-fill another identical duplet and twist the two sets together to form a four balloon cluster. Repeat the step above with four yellow balloons inflated to 4½". Lay the printed latex cluster flat. Place the yellow cluster on top. To secure the base of this arrangement, lay the foil basket with the weight attached on top and wrap the 260 balloon around both clusters. Attach two adhesive tabs facing each other to the top of the foil basket.

Treat three-11" Chicks + Eggs latex balloons with ULTRA HI-FLOAT™. Helium inflate the latex balloons using the latex tip on the regulator. Attach ribbon to the balloons and arrange the balloons so one balloon is floating on top of the others. Tie to the hole in the adhesive grip tab on the foil basket.
