 Holey Box

directions:

Air-fill two–11" Mandarin orange balloons to 11" and tie the necks together to form a duplet. Air-fill another duplet and twist the 2 sets together to form a 4- balloon cluster.

Air-fill 12 quartz purple 5" balloons to 4 inches. Make three–4 balloon clusters. Set aside.

With the Twist-N-Flate™, curl the 160 entertainer balloons. To curl an entertainer balloon, secure the end of the balloon between your thumb and base (web) of the index finger. Wrap the balloon around your index and middle fingers, being careful to keep the balloon flat against your fingers. Place the nozzle end of the balloon on the tip of the twist n flate and fill your balloon. Tie identical colors together loosely. You will have one quartz purple balloon remaining. Set aside.

Air-fill with the Mini Cool Aire® Dual Pro™ Inflator two 18" foil balloons. Be sure to use the lower setting on this machine to avoid destroying the self sealing valve. Tie the balloons together with an un-inflated 260 balloon. Set aside.

Air-fill the 646 balloon leaving about 3 to 4" uninflated. Tie an uninflated 260 balloon to the neck of the 646. Tie the other end to the heavy weight.

Begin assembling the column by wrapping the 11" mandarin orange cluster between the 646 and Heavy Weights™ using the un-inflated 260 to wrap tightly. Insert 1 cluster of the 5" quartz purple balloons on top of the 11" cluster. Wrap tightly with the un-inflated 260 balloon. Attach a set of blue and orange 160 curls to the base of the arrangement. Attach the air-filled 18" foil to the base.

Helium inflate another 18" foil balloon. Tie the balloon directly to the end of the 646 balloon. Place 2 adhesive grip tabs directly at the top center of the 18" balloon. Place the tabs facing each other. To ensure you have the proper adhesion, place some tape on top the tabs.

To complete the column, helium inflate the Grad You Rock shaped balloon. Tie an uninflated 260 balloon on the stem of the balloon. Tie the uninflated 260 balloon directly into the adhesive grip strip. To complete the column, wrap the remaining quartz purple 5" clusters between the shape balloon and 18" foil. Wrap the other cluster between the 18" foil and 646. Wrap a set of 160 curls. Wrap the remaining 160 balloon into the base of the column. Gently wrap the balloon around the 646 and secure to the collar of the 18" balloon.
