 Tabs

equipment:

831
 Mini Cool Aire®
 Dual Pro™ Inflator

829
 Twist-N-Flate™
 Inflator

BR74HG
 Dual Foil + Latex
 Regulator

directions:

Air-fill with the Twist-N-Flate™ two 260 entertainer balloons. Let a small amount of air out of the neck before you tie. This will allow you to manipulate the balloon as needed. This process is called "burping" the balloon. Make a 2" loop twist followed by a pinch twist to make the feet of the greeter. Tie the two legs together. Attach a heavy weight to the bottom of each foot. Make a pinch twist in each leg to create the knee. Air-fill two blue 5" balloons to 4" and tie the necks together to form a duplet. Air-fill another identical duplet and twist the two sets together to form a four balloon cluster. Make an additional cluster. Helium inflate the foil balloon shape and tie an un-inflated 260 balloon to the neck of the balloon. Attach two adhesive tabs to the hand of the foil shaped balloon. Wrap the two sets of clusters to the neck of the foil balloon using the uninflated balloon. Wrap the legs to the 5" latex balloon clusters using the same uninflated balloon. Inflate the 18" foil balloons with helium and tie to the adhesive tabs attached to the hand of the foil shaped balloon.
