

4th of July MagicArch™

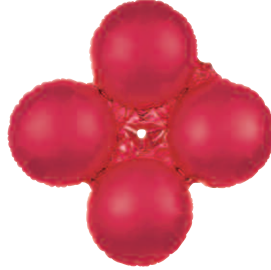

ingredients needed:

W21
Heavy Weights™

15001
Monofilament

13CL-36
16-ea Red MagicArch™
Balloon

44183-36
5-ea 4th of July
36" foil balloon

equipment:

BR74HG
Dual Foil + Latex
Regulator

directions:

Helium inflate 16–MagicArch™ foil balloons. Tie the monofilament rigging line to a heavy weight. Use the line to feed thru the hole in the center of the MagicArch™ balloons. To make this job easier tie the monofilament to a 2" piece of straw. Feed the straw through the hole of the MagicArch™. The straw will keep the balloons from accidentally flying off the line should you drop it.

Helium inflate the firecracker balloons. Tie the monofilament line to the neck of the balloon. Tie the other end of the monofilament line to the arch. Add as many firecrackers as your budget will allow.
