

Holly Christmas MagicArch™

ingredients needed:

13CL-36
16-ea Red MagicArch™
Balloon

77014-36
7-ea Holly Linky
Balloon

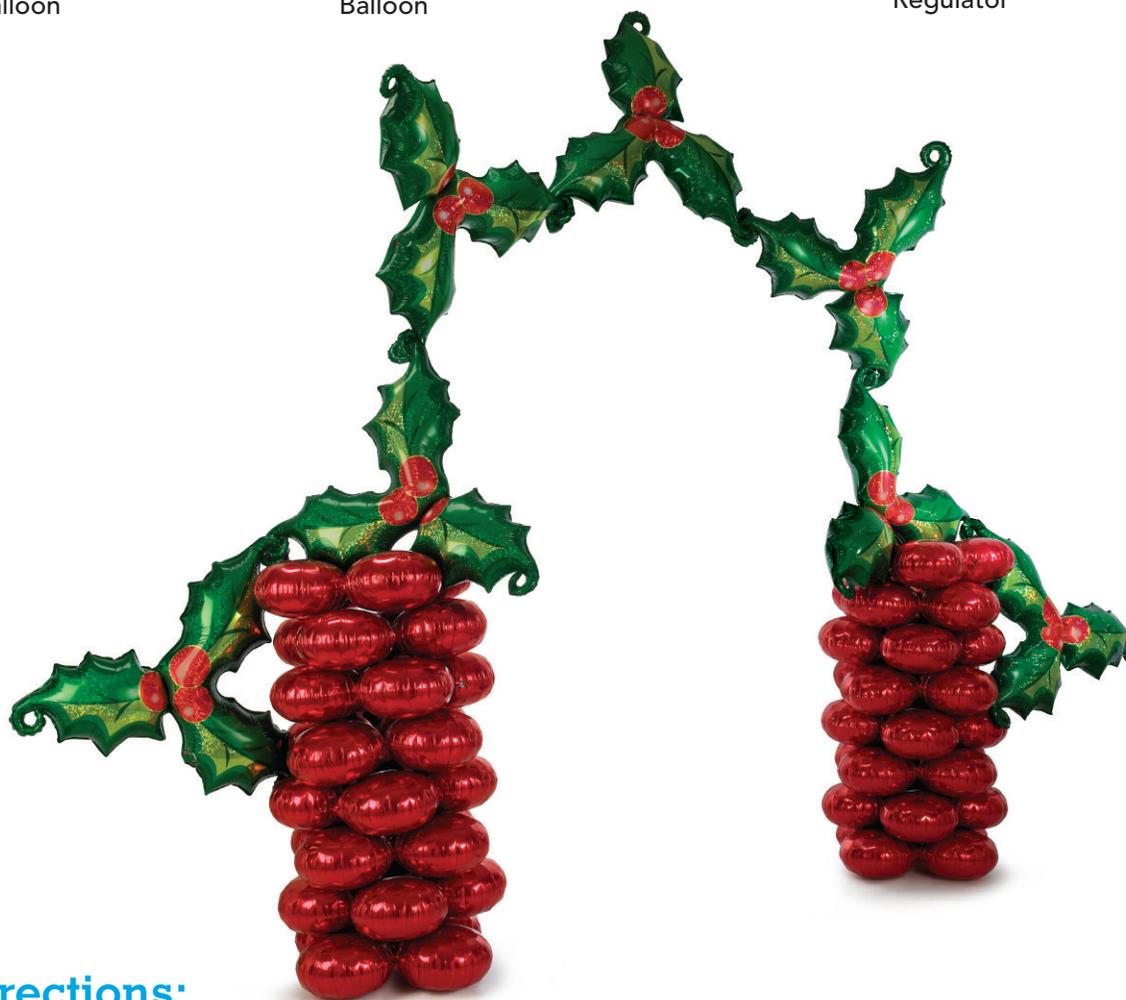

15001
Monofilament

BR74HG
Dual Foil + Latex
Regulator

831
Mini Cool Aire®
Dual Pro™ Inflator

directions:

Helium inflate a holly Linky balloon. Tie the stem of the balloon with monofilament. Leave about 8' of monofilament and cut. Helium inflate eight MagicArch™ balloons and feed the monofilament through the hole in the balloons. Tie the monofilament onto a sand weight. If you do not have a sand weight, make a water weight by inserting one balloon into another and filling one third full of water. Repeat above to make two columns.

Helium inflate three more Linky balloons and link them to each other. Air-fill two more Linky balloons to hang on each side. For added stability, tape each Linky balloon at the linking point.
