AIR-FILL SOLUTIONS

by PEGGY WILLIAMS

burton[®]
+BURTON

the TOTAL gift experience[®]

ingredients:

D31620
Curling Ribbon-
Holographic Silver

280225
Cello Sheets-
Small Dots-White

1-ea 46298-18
18" Foil Balloon

972095
#9 Sheer Ribbon-
Light Blue

1-ea CC107
MaxiCup™ II
Balloon Cup

1-ea HPS20C
MaxiStick™ II
Balloon Stick

equipment:

HI795
Qualatex®
Hand Inflator

802
OASIS® Glue Pan

01560
OASIS® Glue Pillows

instructions:

Air-fill the 18" foil balloon using the Qualatex® hand inflator. Insert the balloon stem into the large hole of the MaxiCup™ II. Wrap the stem clockwise and slip the stem into the hook on the cup. (Please note: there are two hooks on the cup. If the stem is long, use the second hook and bypass the first. If you have a short stem balloon, use the first hook.) Insert the remaining stem of the balloon into the vertical slits for a clean, finished look. If your balloon is not secure, twist the entire cup clockwise one-half turn so the balloon sits firmly on the cup.

Cut the cello sheets into quarters. This will give you four 10" x 10" pieces. Gather the cello squares in the middle and dip into the glue pan. Keep your glue pan at a low setting so that the glue is thick. Glue the cello directly to the MaxiCup™ II balloon cup. It will take approximately ten pieces of cello to fill the cup.

Make a three-loop bow using the #9 light blue ribbon. Add a few ribbon tails using the light blue ribbon. Tie the bow with another piece of ribbon. Add some curling ribbon streamers for a little pizzazz.

Glue the bow to the bottom of the cello. Insert the clear stick into the cup of the balloon. For added security, place a small amount of glue on the stick before inserting into the cup.

OASIS® Glue Pan

01560
OASIS® Glue Pillows

instructions:

Air-fill two 5" blue latex balloons to 4" using the Qualatex® hand inflator and tie together to form a duplet. Air-fill a second duplet. Set aside.

Make a three-loop bow using the #9 citrus ribbon. Add a few ribbon tails using the citrus ribbon. Tie the bow with another piece of ribbon.

Air-fill the Bubbles™ balloon using the Qualatex® hand inflator. Cut the ribbon on the balloon to 12". Slip the balloon stem through the hole in the cup. Wrap the stem clockwise to the second hook, then slip the stem into the hook on the cup. Insert the balloon into the slits on the cup. With the ribbon attached to the Bubbles™ balloon, insert into the slits on the cup. Wrap the ribbon in and out of the slits until secure. Place the stick into the cup. For added security, place a small amount of glue on the stick before inserting into the cup.

Insert the latex duplets, one at a time, into the slits on the cup. Wrap the bow with two curling ribbon streamers around the latex balloons, so that the ribbon is tucked into the bottom of the balloon cluster.

MaxiStick™ II
Balloon Stick

equipment:

HI795
Qualatex®
Hand Inflator

802
OASIS® Glue Pan

01560
OASIS® Glue Pillows

instructions:

Air-fill the 18" foil balloon using the Qualatex® hand inflator. Insert the balloon stem into the large hole of the MaxiCup™ II. Wrap the stem clockwise and slip the stem into the hook on the cup. (Please note: there are two hooks on the cup. If the stem is long, use the second hook and bypass the first. If you have a short stem balloon, use the first hook.) Insert the remaining stem of the balloon into the vertical slits for a clean, finished look. If your balloon is not secure, twist the entire cup clockwise one-half turn so the balloon sits firmly on the cup.

Cut the cello/foil sheets into quarters. This will give you four 10" x 10" pieces. Gather the cello/foil squares in the middle and dip into the glue pan. Keep your glue pan at a low setting so that the glue is thick. Glue the foil directly to the MaxiCup™ II balloon cup. It will take approximately ten pieces of cello/foil to fill the cup.

Make a three-loop bow using the #9 citrus ribbon. Add a few ribbon tails using the citrus ribbon. Tie the bow with another piece of ribbon. Add some curling ribbon streamers for a little pizzaz.

Glue the bow to the bottom of the cello/foil. Insert the clear stick into the cup of the balloon. For added security, place a small amount of glue on the stick before inserting into the cup.

instructions:

Air-fill the 18" foil balloon using the Qualatex® hand inflator. Insert the balloon stem into the large hole of the MaxiCup™ II. Wrap the stem clockwise and slip the stem into the hook on the cup. (Please note: there are two hooks on the cup. If the stem is long, use the second hook and bypass the first. If you have a short stem balloon, use the first hook.) Insert the remaining stem of the balloon into the vertical slits for a clean, finished look. If your balloon is not secure, twist the entire cup clockwise one-half turn so the balloon sits firmly on the cup.

Cut the foil sheets into quarters. This will give you four 10" x 10" pieces. Gather the foil squares in the middle and dip into the glue pan. Keep your glue pan at a low setting so that the glue is thick. Glue the foil directly to the MaxiCup™ II balloon cup. It will take approximately ten pieces of foil to fill the cup.

Make a three-loop bow using the #9 black ribbon. Add a few ribbon tails using the black ribbon. Tie the bow with another piece of ribbon. Add some curling ribbon streamers and a strand of Dazzling Sea acrylic wrap for a little glitz. To use the acrylic wrap, cut into 3' lengths, then cut down each row to make 21 strands. With a 5 yd bolt of acrylic wrap, you can make 105 strands of diamond ribbon.

Glue the bow to the bottom of the foil. Insert the clear stick into the cup of the balloon. For added security, place a small amount of glue on the stick before inserting into the cup.
