Product #CC107

Qty
1

MaxiStick™ II Balloon Stick
Product #HPS20C

Qty
1

Qualatex®
Hand Inflator
Product
#HI795

Directions

1. Using the largest tip, air-fill the heart foil balloon using the Mini Cool Aire® Dual Pro™ Inflator on high speed.
2. Slip the tail of the balloon through the large hole in the balloon cup and wrap clockwise to the first hook, for short tails, or the second hook, for longer tails. Insert the remaining end of the tail into the vertical slit. Insert the balloon stick into the bottom notch of cup (a dot of glue can go on the stick before insertion for added security).
3. Using the hand-pump, inflate the 11" latex balloons (10 pumps each). Hand-tie into pairs and then the pairs together to form a quad.
4. Twist the quad onto the balloon stick until it is in the proper placement.
