Product #Q-11-26

Qty 1  
MaxiCup™ II Balloon Cup  
Product #CC107

Qty 1  
MaxiStick™ II Balloon Stick  
Product #HPS20C

Qty 1  
Qualatex®  
Hand Inflator  
Product #HI795

Qty 1  
Double Face Satin  
Ribbon-Light Pink  
Product #DF0902

Qty 1  
Double Face Satin  
Ribbon-Light Orchid  
Product #DF0908

Qty 1  
Mini Cool Aire®  
Dual Pro™ Inflator  
Product #831

## Directions

- Using the largest tip, air-fill the Bubble™ balloon using the Mini Cool Aire® Dual Pro™ Inflator on high speed.
- Slip the tail of the balloon through the large hole in the balloon cup and wrap clockwise to the first hook, for short tails, or the second hook, for longer tails. Insert the remaining end of the tail into the vertical slit. Insert the balloon stick into the bottom notch of cup (a dot of glue can go on the stick before insertion for added security).
- Using the hand-pump, inflate four of the 11" latex balloons (10 pumps each). Hand-tie into pairs and then the pairs together to form a quad.
- Next, using the hand-pump, inflate the last four 11" latex balloons (5 pumps each). Hand-tie into pairs and then the pairs together to form a second quad.
- Twist the larger quad onto the balloon stick first until it's up against the Bubble™ balloon. Next, twist the smaller quad onto the balloon stick until it's in the proper placement, up against the first quad.
- Cut a 24" length of each ribbon. Place both pieces together, weave the ribbon through the second quad and around the stick until both ends are even, and tie a knot, creating 4 ribbon tails.
- For each of the ribbon tails, fold in half lengthwise and cut at an angle (outside edge longer than inside edge).
