Heavy Weights™
Balloon Weight

HF118
ULTRA HI-FLOAT®

equipment:

831
Mini Cool Aire®
Dual Pro™ Inflator

BR74HG
Dual Foil +
Latex Regulator

Football Arch

directions:

Treat all the 12" LINK-O-LOON® football balloons with ULTRA HI-FLOAT®. Keep them propped upright to ensure that HI-FLOAT® does not run out of the balloons. Helium inflate two chains of fifteen 12" LINK-O-LOON® football balloons. Tie a Heavy Weights™ balloon weight to each end.

Air-fill one 5" black latex balloon sized to 3". Tie the balloon directly to a link. Repeat this until all the LINK-O-LOON® joints have a black latex attached. It will take twenty-eight balloons. Helium inflate one 12" LINK-O-LOON® football balloon. Air-fill two 5" red latex balloons to 3" and tie to each end of the LINK-O-LOON®. Link the arches together by locking the red 5" latex balloon around the black five inch balloons. Repeat this step until the arch is complete.

Use your team colored latex to finish off the bottom of this arch or anchor it to the top of two columns.
