Dual Foil +  
Latex Regulator

### directions:

Remove the cup from the 14" pre-inflated Linky heart. Using strong packing tape, tape the balloon stem back on itself. Tip the Linky on its side and tape a Heavy Weights™ balloon weight to the bottom. Apply two Clik-Clik™ adhesive strips to the top of the Linky heart.

Helium inflate both Orbz™ balloons with the latex tip on the regulator until wrinkle free or use the Inflation Gauge provided in the Orbz™ package. Tie directly to the Clik-Clik™ adhesive strips on the Linky heart. Curl the excess ribbon to decorate the top of the Linky.
