Candy Box
-Zebra

equipment:

BR74HG
Dual Foil +
Latex Regulator

802
SUREBONDER®
Glue Skillet

01560
OASIS®
Glue Pillows

directions:

Fill the candy box with the candy of your choice.

To up-grade the 9" pre-inflated foil: Cut the 20" x 20" cello sheets in half. Cut in half again. This will make 10" x 10" sheets. To save time, leave the cello sheets in the package while cutting. Tear each 10" x 10" sheet of cello in half. Pinch in the middle and dip into the glue skillet. Arrange eight pieces of cello around the cup of the pre-inflated foil. Curl 4½ yds of curling ribbon. Cut into 6" pieces and tie together. Glue under the cello skirt. Repeat step above and glue on the other side of the stick. Place the balloon stick into the hole in the back of the candy box. Make a small bow with the zebra curling ribbon and glue to the top of the box.

Helium inflate the 18" foil using the foil tip on your regulator. Tie the zebra curling ribbon to the balloon stem. Tie to the candy box.
