-Red

1-*ea* 22030-18
20" Starpoint Foil
-Red

8-*ea* Q-05-28
5" Qualatex®
-White

HT3401
Curling Ribbon
-Hearts

1-*ea* W27
Heavy Weights™
Balloon Weight

equipment:

831
Mini Cool Aire®
Dual Pro™ Inflator

BR74HG
Dual Foil +
Latex Regulator

directions:

Air-fill the Diamondz™ foil with the Mini Cool Aire® Dual Pro™ inflator on the low pressure setting. Tape a Heavy Weights™ balloon weight directly to the bottom of the Diamondz™ foil using strong packing tape.

Helium inflate the Orbz™ balloon with the latex tip of the regulator until wrinkle free or use the Inflation Gauge provided in the package. Air-fill the Starpoint foil. Tape the Starpoint foil directly to the stem of the Orbz™ balloon. Tie the ribbon to the other end of the Starpoint foil and attach to the stem of the Diamondz™ foil.

Air-fill two white 5" Qualatex® balloons to approximately 4" and tie together to make a duplet. Air-fill an identical duplet. Twist together to make a four-balloon cluster. Make one more cluster. Wrap the clusters around the stem of the Orbz™ balloon and around the stem of the Diamondz™ foil.
